

Water Testing Labs

Compiled by the Tompkins County Environmental Health Division

This listing is for your convenience only, and no representations are made for the quality of the work or the completeness of the listings.

Below are laboratories that provide information, sampling instructions and containers, and analyses for private or public water supplies in this area. All analyses needed to comply with any regulation (such as Part 5 of the New York State Sanitary Code, or the Tompkins County Sanitary Code) must be performed by a laboratory certified by the New York State Health Department. **These labs are only certified for the types of analyses indicated.**

When you are concerned about the microbiological quality of your water, the levels of minerals or metals (inorganic), or the possibility of solvent (organic) contamination of your water, you are encouraged to contact the **Environmental Health Division at (607) 274-6688** for consultation. If you then choose to utilize the services of any of these labs, you should call them as soon as you decide. In all cases, it will be necessary to obtain instructions and appropriate sampling containers from the lab and this may entail a few days wait before sampling can begin. **In no case should you sample before contacting the lab.**

Community Science Institute (CSI)
95 Brown Rd, Rm 283 Langmuir Lab
Ithaca, NY 14850
(607) 257-6606
Microbiological, Inorganic, Organic
